

Advance® Detergent

Ultra-Concentrated Detergent

Advance Detergent is an extremely concentrated liquid alkaline C.I.P. detergent enhanced with powerful surfactants for superior cleaning of all types and sizes of milking systems. Advance Detergent is designed to be used in combination with any chlorinated sanitizer, creating unequaled liquid cleaning capability.

Features and Benefits

- **Ultra Concentrated Formula**

Provides excellent cleaning in all types of systems at a very low usage rate.

- **Caustic Powder-Like Strength**

Adding chlorine with this product in the wash vat enables Advance Detergent to reach caustic levels similar to many of the alkaline powdered detergents used today.

- **Customized Cleaning Recommendation Flexibility**

Advance Detergent enables sanitation specialists to make more accurate cleaning recommendations for individual operations by addressing differences in water quality, water temperature, as well as system design and mechanics.

- **Polyacrylate Sequestration System**

A powerful new sequestration system technology holds hardness, minerals, and milk soil loads in suspension to prevent mineral and soil deposits.

- **Contains Powerful Surfactants**

Superior wetting ability enables Advance Detergent to rapidly lift soils from milk contact surfaces.

- **Excellent Product Stability**

Due to the absence of chlorine from this product, the shelf-life of Advance Detergent exceeds conventional liquid C.I.P. detergents.

- **Less Packaging**

High dilution rates reduce product usage amount and plastic packaging disposal issues.

- **100% Customer Satisfaction**

All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.
